

apply to capital construction. I am one that would always oppose, and I disagree strongly with Senator Warner on this, that the cigarette tax dollars is a declining source of revenue, every year it is going to go down, just like the lottery money. Simply my point of view, that money should go for one-time expenditures. LB 760 is for three years, and then we reassess what that fund is worth, and then make some projections. Now as far as the many vetoes we talked about today, you know, if LB 760 sticks, it would not have had one bit of difference on any of those because with what has remained in the bill between Beadle and Copeland, what cigarette money does lapse the second year of the biennium, you could not have applied to any of those vetoes. Yes, it is true that maybe next biennium, you could argue that that money you could apply it towards some of those type of things but certainly not the biennium we are talking about this year. Senator Warner is right. We should not make commitments too long term. LB 760 is not too long. It is literally all we are going to spend on capital construction this biennium and, actually, unless time gets better, maybe all we spend for the next two bienniums, the next four years. And the Governor, I just strongly disagree with the prison issue. We do not need to lock this money up for prisons. If we do need to do that in years to come, we have planned accordingly.
